

# Nature and Human Life of Bungo Ono

## The Relationship Between the People and Nature

From the Sobo-Katamuki Mountain Range with its precious plants and animals, to the rice and vegetable fields with the landscapes of wooded hills near residential "Satoyama" areas, Bungo Ono has a lush environment, with Ono River, the main river in Kyushu, running through the center. And the people continue to lead lives here for a long time.

ZONE 3 describes the characteristics of the ecosystem of Bungo Ono, and features exhibits that show the relationship between the environment and livelihoods of the people.
